

**Indian
Auto LPG
COALITION**
Fuelling a greener future

**ALL INDIA
AUTO LPG DISPENSING STATION (ALDS)
DIRECTORY
2008**

Warming up to all the action with more than 500 stations in the country now and Auto LPG being available in more than 250 cities already, more and more vehicle owners are converting to this Economical and Environment Friendly Fuel, paving way for India to become one of the largest Auto LPG markets in the world in the next few years.

Low costs of infrastructure and conversion, easy availability, versatility of use and of course, an impeccable safety record make Auto LPG the only viable, un-adulterable and environment friendly alternative auto fuel in India.

Indian Auto LPG COALITION

*Fuelling a **greener** future*

IAC, a member of "Central Motor Vehicle Rules - Technical Standing Committee" (CMVR-TSC) & "Standing Committee on Emission Legislation" (SCOE), Government of India, is widely recognized as the nodal body for the Auto LPG Industry in India with practically all major stakeholders on board. IAC membership base is expanding rapidly and we now have the Oil Sector PSUs, Private LPG Marketers, Kit Suppliers, Equipment Manufacturers and Turnkey Installers as members, in addition to a very proactive support of World LPG Gas Association, USAID, ARAI and SIAM.

We have been actively organizing Seminars, Workshops and various activities for state RTO's like that for Maharashtra, Karnataka, participating at various International forums like World LPG association activities in France, USA, China & South Africa and initiating very meaningful interactions with the leading OEs.

Please visit our comprehensive website at www.iac.org.in for more details.

Mission

Promote LPG in an integrated manner, as an alternate, gaseous, environment friendly fuel by involving all stakeholders to bring a cost effective & safe auto fuel to Indian consumers, using the best global practices

Economy of a diesel vehicle, **Emissions** of a CNG engine and **Performance** of a petrol engine

Why LPG-as an alternative fuel?

- LPG impacts greenhouse emissions less than any other fossil fuel.
- LPG is a clean burning, high octane and an environment friendly fuel.
- In one of the studies, findings state that LPG vehicles emit significantly less pollution than their diesel and petrol fuel counterparts. Compared to Petrol, LPG produces;
 - Up to 15% less greenhouse gas
 - Up to 50% less particulates
 - Up to 60% less CO
 - Up to 33% less NO

Virtually Zero Evaporative emissions of hydrocarbons
Up to 80% less air toxics like benzene and 1,3 butadiene

A brief comparison of vehicular emissions of Auto LPG vis-à-vis Petrol and Diesel is:
Auto LPG Emissions*

Compared to Petrol	Compared to Diesel
75% less Carbon Monoxide	90% less Particulates
85% less Hydrocarbons	90% less Oxides of Nitrogen
40% less Oxides of Nitrogen	70% less Ozone forming potential
87% less Ozone forming potential	60% less Carbon Monoxide
10% less Carbon Dioxide	

* Based on tests undertaken at the independent Millbrook Vehicle Emissions Laboratories (UK) in 1998 and 1999.

Advantages of ALPG

- Can be used in trucks, buses, LCV's, MUV's, passenger cars, three wheelers and two wheelers.
- Can be easily transported and stored in stand-alone facilities.
- LPG is pressurized as 5-7 bars as against a minimum of 200 bars for CNG, which makes it safe and conventional fuel.
- The automotive use for LPG has an excellent safety record and various crash tests and fire tests proved that owing to the strength and integrity of the fuel tank, it is safer than petrol and at par with diesel.
- Extremely Low Infrastructural costs in comparison to other available alternative fuels.
- Low costs of conversion in comparison to other available alternative fuels.
- LPG fuel systems are sealed and evaporative losses are negligible.
- No possibility of theft/pilferage.
- Better Engine Life as a result of lesser acids and carbon deposits.
